

ELECTRONIC DOCUMENTING SERVICES

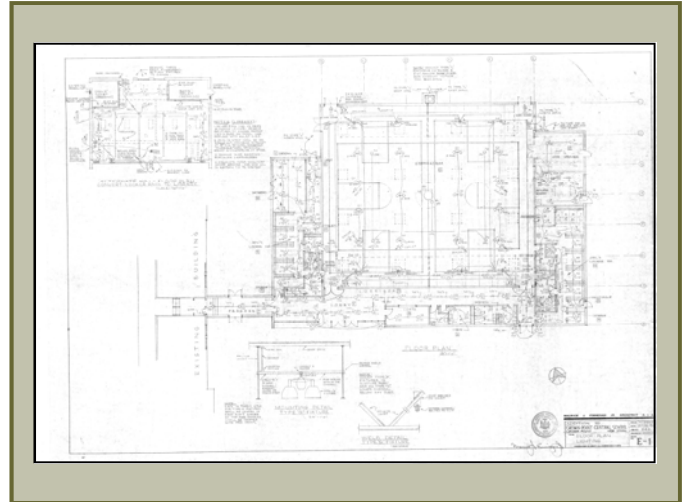

Archived Drawings

Blueprints

Scan Quality

**Transform old drawings/blueprints or
maintain new drawings as scans
that will always remain in good condition.**

AES Northeast Offers New Electronic Documenting Services! (i.e. Scanned Drawings)

AES is pleased to announce the availability of new electronic documenting services. AES Northeast will provide “scanned” images of old large blueprints, survey maps, building drawings, diagrams, and other types of graphic images (i.e. drawings). Scanning is an electronic “copy” of graphic images saved in a computer file format that can be viewed on most standard computers with basic viewing software. The scanned drawings have many benefits and uses, such as:

- ✧ Restore old torn blueprints for archives
- ✧ Allow viewing of drawings on standard computers
- ✧ Eliminate large drawing(s) file storage space
- ✧ Reverse dark blue drawings to white background with black graphics
- ✧ Easily transmit scanned drawings via email or CD

If you are interested in our electronic documenting services, please contact our office for further details.
